HOW KICK ASH BASKET® WORKS

*Kicking Ash +
Making Flames*

1. SHAKE THAT ASH

With the Kick Ash Can® in the bottom of your cold grill, lift the Kick Ash Basket® and shake that ash from left-over charcoal. Set the Basket aside to remove the Can & dump out the ash.

2. GET SET

Place the Kick Ash Can® back into the bottom of the grill. Set the Kick Ash Basket® on top of the Can and top off with more lump charcoal.

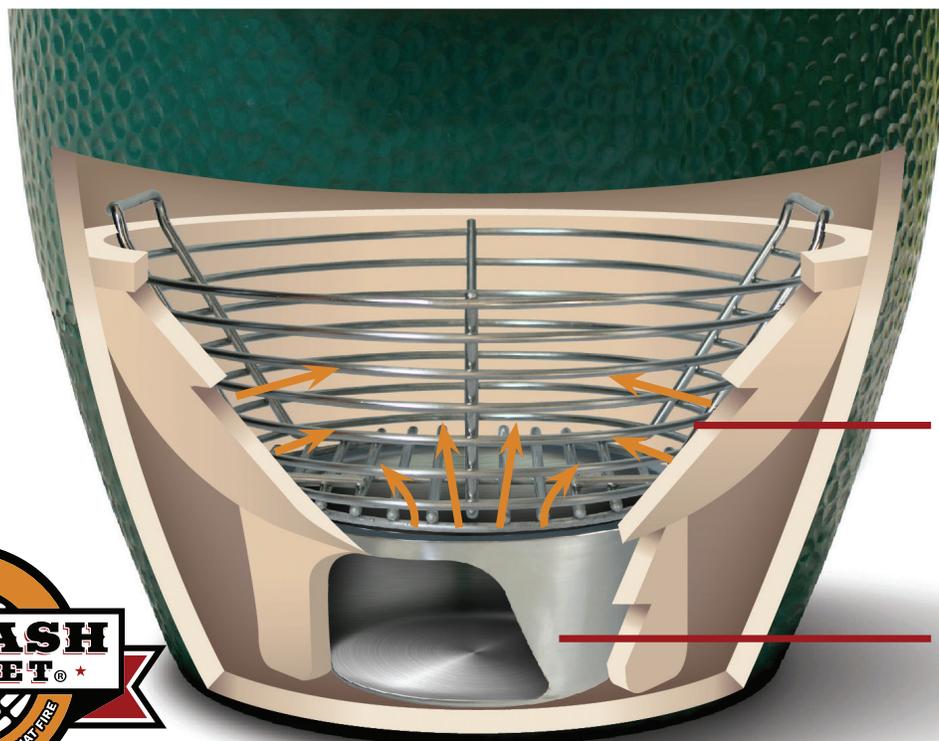

3. LIGHT THAT FIRE

Use a divider to have a direct cook with half a load of charcoal or less. Best practice is to light a few pieces of left over lump charcoal in a small spot on top to prevent excess sparking if using a grill torch.

**WE HAVE A KICK ASH BASKET® FOR
MOST PREMIUM CHARCOAL GRILLS**
